

Mind Your Business

and watch your
company profit

Working with you to reduce casualties

www.somersetroadsafety.org

Our aim is to improve all aspects of occupational driver safety through workshops that promote sensible and responsible driving for the benefit and safety of everyone.

Mind Your Business workshops offer advice, tips and strategies to those who drive for work. Our road safety experts will show you how to minimise the risks associated with occupational driving and improve bottom-line performance through;

- Reduced fuel consumption
- Fewer collisions resulting in lower repair bills
- Lower insurance premiums
- Lower vehicle maintenance costs
- Reduced stress levels resulting in less time off work, higher staff retention, motivation and commitment
- Less time wasted on related administration
- Meeting the requirements of current Corporate Manslaughter legislation.

Our workshops also provide an opportunity for occupational drivers to consider their vulnerability, how to reduce their high casualty rate and take proper steps to meet current legal responsibilities.
