

Route 60+

for older drivers

Working with you to reduce casualties

www.somersetroadsafety.org

As we age, changes in health and ability can affect driving. Let us help you deal with these changes to achieve a safer driving life for longer.

Although research indicates that older drivers have the least number of collisions, on a 'per mile' basis we find that older drivers are at far greater risk – and this increases with age.

Route 60+ is a free presentation for drivers, addressing how both vehicles and driving skills have changed over the years and how these can be updated.

Those attending can expect to receive:

- A 'goodie' bag including a hi-vis jacket and a copy of the latest highway code
- Refreshments.
